　　　　A. Technologically　　B. students　　　C. flexible　　　D. their

Read the following passage and choose the best word to complete each of the numbered blanks:
3D printers are machines that print objects. Believe it or not, the first 3D printer __(15)__ in 1984, and in 1993, the first 3D printing company was set up! Since 2004, 3D printers have reached a price and size that allows almost anybody to own one, and in 2018, over half a million were sold.

3D printers work in a similar way to the old computer printer, __(16)__ shot tiny jets of ink onto paper to make words. Instead of ink, however, 3D printers shoot plastic, metal, wax or another material that hardens __(17)__. By adding thousands of layers, the 3D shape is slowly made.

People are using their 3D printers to make any object you can imagine, from jewellery like rings __(18)__beautiful ornaments. Sports companies are using them to make boots and trainers that perfectly fit athletes' feet. But 3D printers can have a more serious use - one that might save your life. Doctors are using them to create __(19)__ implants such as bones and joints that exactly match the patients. This makes surgery easier and recovery faster.

3D printers are developing all the time, and are becoming the piece of technology every home should have. And soon, who knows - you might be able to print one yourself.

Question 15.   A. invented   B. has been invented   C. was invented   D. was being invented
Question 16.   A. who   B. that   C. whose   D. which
Question 17.   A. instantly   B. instant   C. instance   D. instancy
Question 18.   A. for   B. to   C. with   D. on
Question 19.   A. electronic   B. digital   C. medical   D. physical

Read the following passage and choose the best answer to each of the questions:

We've covered a brief history of technology in education from the 1980s up to now. But what are the actual benefits of using educational technology (edtech) in the classroom?

It creates engaging learning environments
Technology has a positive impact on student engagement, according to research. It can help educators create exciting, engaging and memorable lessons. Of course, higher engagement makes pupils more motivated and makes lessons more enjoyable for both students and teachers. Whether the teachers use virtual reality headsets, tablet, or coding platforms like CoSpaces, the use of technology in education can truly **grab** students' attention! While traditional teaching methods are effective at engaging some students in a classroom, integrating technology in education can help educators engage every student in the class.

It improves interaction and communication
Technology can also improve communication and collaboration at schools. The collaboration among students or communication between students and teachers will surely be better. Students can work together and create shared projects even if they're not in the classroom together.

It prepares students for the future
Digital learning helps students improve invaluable digital skills which are fundamental in modern life. While today's learners are naturally proficient with technology like smart phones and computers, using **them** in an education setting throughout K-12 will familiarise them with more practical applications.

Question 20.   What is the reading text mainly about?
        A. A brief history of using technology in education
        B. Some advantages of using technology in education
        C. Effective ways of using technology in education
        D. Problems of using technology in education
Question 21.   Which of the following is closest in meaning to the word " **grab**" in paragraph 2?
        A. capture   B. mix   C. download   C. participate
Question 22.   Which of the following does the pronoun **"them"** in the last paragraph refer to?
        A. learners   B. applications   C. smartphones and computers   D. modern life
Question 23.   According to paragraph 3, all of the followings are true about using technology in education EXCEPT _____.
        A. Student- student collaboration will become better.
        B. Students can work together even if they are not in the classroom.
        C. Teacher- student communication will not be improved.
        D. Students can create shared projects.

Question 24.   According to information in paragraph 2, which engages more students?
    A. traditional teaching   B. integrating technology in teaching
    C. virtual reality headset   D. coding platform

Key. True/ False: 1. F 2. T   3. F   4. T
Gap-filling: 1. Connection   2. Emails   3. Homework   4. parties

Gap-filling.
Nowadays, we spend hours online but is it good for us? Sally Evans investigates.
Kevin McDonal checks his emails when he is having breakfast. He uses his smartphone on the train to work and gets nervous in tunnels where there is no internet connection. At his office, he uses two computers and his phone and checks his messages every minute. Because of that he does not concentrate and has problems at work. In the evening, he play computer games and goes to sleep with his net book on the bed. When the family are on holiday, Kevin uses his smartphone to check his emails on the beach.
Kevin's wife, Janet, does not like his internet use but she spend four hours online every day, too. She sometimes forgets to do things because she is busy on Facebook. Their son, Jonathan, has got two computers in his bedroom and plays online computer games, sends messages and does his homework at the same time until late at night. Because of that, he is often tired and has problems at school. He sometimes stays at home and plays games on the computer when his friends have parties.

True / False.
Facebook and me by Bethan
1st May: I think I am a Facebook addict. I log on to Facebook every day to chat to my friends – real friends and loads of online friends. Sometimes I have ten conversations going at the same time. I upload photos and update my Facebook profile all the time. but recently I've started to feel worried if I am offline for more than a few hours. And then last weekend I forgot to meet a real friend because I was online! I've realized I could have a problem. So I've decided to give it up for a while.
11th May: I found it really hard. Facebook and my friends demanded to know why I had left. I spent the first few evenings wondering what everyone was chatting about on Facebook. I even phoned a couple of friends to find out. The fourth night wasn't quite so bad. I actually concentrated on my homework better and I had more time to watch my TV programs. And I spoke to my friends during the day at school. At the end of the first week, I reactivated my account. I think Facebook is fun and it's useful for posting messages to friends and sharing photos. But I'll try not to spend so much time on it in future.
